

Khaled Ibrahim

Junior Back-End Developer -
Laravel

 Ismailia, Ismailia Governorate,
Egypt

Professional backend with 2+ years of top-quality PHP development experience. Highly skilled at creating applications with PHP web frameworks such as Laravel, and I have a solid understanding of MySQL. Thrive in hands-on, action-oriented culture by working well under pressure and adapting to change quickly.

Projects

Inventory Management System

IMS is a sales, purchase, and stock management software. It is fast and easy to use. You can use it for retail, and different types of sales management for one or multiple branches. Other reports and configurations can make it suitable for your business. IMS is developed using Laravel, bootstrap & HTML & MySQL databases.

school Management System

School System is School System is built on Laravel and is easily coded with best practices and a human-readable format for enhancement. The system has all the basic requirements like login, registration, Forgot Password, and user management. The admin can manage every corner of the system and can create multiple courses. The user can browse through the courses and enroll as a student. All of these features are carefully crafted and well-documented to make the job easier.

social-media-Website-using-laravel

Social-Media is a Social-Media online social media and social networking service created to connect people all around the world.

Faceconnect may be accessed by many devices with Internet connectivity, such as desktops, laptops, tablet computers, and smartphones. After registering to use the site, users can create a customized profile indicating their name, occupation, attended schools, etc. Users can add other users as "followers", exchange messages, and post status updates, app is developed in Laravel 9v and MySQL database.
